

## Event Management Software

We have developed our own programme, to help us manage our projects more efficiently, together with colleagues at one of our partner companies, over a number of years.

We are now in the position of being able to offer this system, built by an event management company, for use by event management companies, to other agencies or to corporate clients for their own use.

There is no expensive programme to purchase and we won't try and sell you several expensive training days in order for you to be able to use the system. You won't need expensive IT support either.

This is a hosted solution. Our IT partners will run your programmes on a secure area of their servers with password protection and guaranteed confidentiality, and it's easy to use.

Each of your events can have its own website that provides your guests with all of the information that need and an online registration facility. You receive a full reporting structure that tells you everything that you need to know to manage the event.

As each application is bespoke we won't quote a cost here, but a call to our offices to discuss your needs will provide us with the information that will enable us to show you just how cost effective this system is.

Follow the links opposite to have a look at just some of the applications that we've used this system for.
