

European NHC Convention

For over 10 years we have created, planned, organised and managed Honda's European Quality Circles Convention, with around 400 guests from across EMEA

Almost always held at or near one of Honda's European facilities we have built presentation theatres inside training school workshops, warehouses, factories and, of course, some very nice conference centres.

We have taken the NHC Convention to Paris, Brussels, Budapest, Barcelona, Istanbul, London, Rome and Pescara.

We create the theme for the event, design all of the graphic content, book the venues, arrange all travel and transfers, arrange the catering, handle all of the production, build and maintain the event website and carry out all of the delegate management on Honda's behalf
